success: cost of adding the filter at test time (unfiltered agent): off - on
success: filter-trained vs unfiltered-trained, filter on, mean actions
success: filter-trained vs unfiltered-trained, filter on, sampled actions
success: sampled - mean actions, filter-trained agent
success: sampled - mean actions, unfiltered-trained agent
success: filter-trained (sampled) vs potential field, filter on
stall rate: Type I rate: trained with filter - trained without (mean)
stall rate: Type II rate: trained with filter - trained without (mean)
stall rate: Type II rate, trained with filter: sampled - mean
stall rate: Type I rate, trained with filter: sampled - mean
